**Michael Riotto Design (MRD) is an international lighting design/build, firm based in New York City.** The mission of MRD is to provide the highest quality of service first, and combine that service with the latest technology and expertise to create successful projects. Our projects range from new builds and renovations, to specialty systems and custom solutions. MRD is proud to be a full service company with experience in architectural, entertainment and specialty environment lighting design, installation, product development, and access to the latest technologies.

## **Technical Systems Designer**

Michael Riotto Design (MRD) is currently seeking an experienced Technical Systems Designer, to immediately expand its team. Experience with Architectural and Entertainment lighting a must, must be willing to travel extensively and hold a valid passport.

## **General Responsibilities:**

- Generate project documentation such as CAD, Load Tables, and related schematic drawings.
- Maintain project budgets and due dates.
- Generate bill of materials for procurement.
- Assist with design development and solutions, from a technical standpoint.
- Serve as On Site representative and project leader.
- Lead Sub Contractors to the successful installation and completion of scope.
- Assist with overall company work flow.

**Experience:**

- Minimum 4 years experience in lighting system design, construction management, or related lighting technology fields.
- Completion of post graduate studies from an accredited university in related field of study.
- Project management experiences a plus.
- Knowledge of CAD drafting software, Microsoft Office, other design and lighting related software.
- Working knowledge of Architectural and Entertainment lighting equipment, dimming systems, LED equipment, and controls.
- Working knowledge of installation techniques and practices as it pertains to permanent and temporary lighting installations.
- Experience with fabrication and outsourcing a plus.
- Strong sense of professionalism, ability to adapt to dynamic project environments, strong communication and organizational skills.

Salaries are commensurate with experience. MRD offers benefit packages, and is an equal opportunity employer. All inquiries are considered confidential.
